## NYS STANDARD

ELA 1 Key Ideas 1.1.3, 1.1.5

## GRADE LEVEL

Grades 1-2

## STUDENTS SERVED

40 Students

## PROGRAM DESCRIPTION

The purpose of the grant was to obtain a variety of software to integrate technology with reading skills at grades one and two.

We purchased software, set up materials in the classrooms for student use, we modeled the proper use of software, and we had the students use the software in centers.

We needed the software and the technology assistant to implement the grant.

## STUDENT OUTCOMES

Students improved their reading skills, such as blending, decoding, fluency, through the use of the reading software in centers.

They improved their independent computer skills.

Students were able to make connection with the skills taught and the skills on the software. Example, when the first graders learned the silent e rules, they were able to apply it and practice it through many of the games,.

The second graders were able to practice creating compound words and used them correctly in a sentence.
