## NYS STANDARD

MST Standard 3: Mathematics

## GRADE LEVEL

K-2

## STUDENTS SERVED

11 students

## PROGRAM DESCRIPTION

The purpose of this grant was to provide students struggling in the area of mathematics with extra support and practice during the summer break. Students were recommended for the program by their teachers. The parents that committed to the program then had to attend an informational meeting where I explained how to use the Math-Pack.

Every Math-Pack contained hands-on manipulatives, including but not limited to: base-10 blocks, pattern blocks, flashcards, rulers, thermometers, dominoes, Judy Clocks, etc. Also included were binders with activities for the students to complete. Everyday Math games were also included to reinforce basic skills from our math series. Parents were asked to complete an evaluation form concerning their opinions of the Math-Packs program.

## STUDENT OUTCOMES

Students enjoyed playing with the different hands-on manipulatives and activities that were a large component of the Math-Pack. Students were able to at their own pace to complete the tasks. Parents were able to take an active role in their child's education and were able to adjust the activities to focus on the part of the math program where the individual students required the most assistance. The Math-Packs helped to open the dialogue between families in the area of mathematics. Evaluations of the students who were in the program were completed by way of classroom observations.
